

### Tips for looking after your windows

Your new windows need very little maintenance but here are some tips to keep them looking good and working well:

#### Ventilation tips

Your new windows are designed to close very tightly and save energy, so they will be better sealed than your old ones. As they are double glazed, under normal circumstances, they will also prevent condensation. By opening your windows every day, you will let out moist air and let in fresh air.

#### Cleaning tips

- You can clean slightly dirty frames with warm water and washing-up liquid.
- Avoid using harsh cleaning fluids and dry cleaning with a duster.

#### Looking after fittings

- The make sure that your windows will always open smoothly, oil the moving parts once or twice a year
